EMPLOYEES!**

WCTI
WORKERS' COMPENSATION
TRUST OF ILLINOIS

Administrator:
Cannon Cochran Management Services, Inc.

WCTI knows that accidents occurring in your company cause more than just injuries to your employees.

Expensive medical costs, decreased work productivity, increased overtime and replacement of the injured employee are concerns in all work-related injuries.

When accidents occur, The Workers' Compensation Trust of Illinois offers aggressive claims management techniques and enhanced managed care programs. These programs assure that the injured employee receives the proper medical treatment and returns to work promptly.

The WCTI Safety Team will work with you to improve your safety records and reduce your workers' compensation costs.

If an employee injury does occur, WCTI members are provided the opportunity to participate in the claim management process. They also have control of their workers' compensation issues! **Do you?**

Why WCTI?

The Workers' Compensation Trust of Illinois is your best resource towards establishing a world class safety program. In today's unstable insurance marketplace, it's easy to find a cheaply priced workers' compensation policy. But, the cheapest insurance isn't always the best value in the long term.

Since 1981, safety-minded Illinois manufacturers have utilized the Workers' Compensation Trust of Illinois as a long term solution to their insurance needs. WCTI members have enjoyed annual savings as much as 60 to 70% on workers' compensation costs!

WCTI returns unused claim funds. This self-insurance program outperforms traditional insurance companies and combines innovative loss control services, accident prevention and aggressive claims management which means lower premiums for your company - and more money in your pocket!

In addition, WCTI members are provided with:

- Frequent and useful safety training, information and assistance
- Quarterly newsletter information regarding technical safety issues, accident trends and accident prevention techniques
- Supervisor safety training outlines which make it easy for supervisors to conduct monthly employee safety meetings

For more information or to see if you qualify for Workers' Compensation coverage with WCTI, please contact:
